## INTRODUCTION

This bibliography forms a supplement to the earlier Working Paper 291 published in September 1980. It lists material published during the past 2½ years as well as some obvious omissions from the original.

The classification remains much the same, although some amendments have been made. Sections 1, 2 and 3 "Marxism, general", "Marxist economics" and "Marxist philosophy" have been amalgamated to form one general section. Similarly, the dubious distinction between "class" and "power and the state" has been dropped, the two sections being brought into one. The section (12) on "urban finance" has been removed. Finally, a new section on "Resources and the environment" has been added.

The cross-referencing system remains the same. References which fall into more than one section are included in each of those sections, the cross-references being indicated by the number(s) of other section(s) in parentheses after each reference. Again, cross-referencing and repetition have been kept to a minimum.
